CONTENTS VOLUME 66 MARCH 1984

page 1 OCKLEFORD, C. D., DEARDEN, L. and BADLEY, R. A. Syncytioskeletons in choriocarcinoma in culture

21 MIYAKAWA, I., AOI, H., SANDO, N. and KUROIWA, T. Fluorescence microscopic studies of mitochondrial nucleoids during meiosis and sporulation in the yeast, *Saccharomyces cerevisiae*

39 GABBIANI, G., GABBIANI, F., HEIMARK, R. L. and SCHWARTZ, S. M. Organization of actin cytoskeleton during early endothelial regeneration *in vitro*

51 GRINNELL, F. and LAMKE, C. R. Reorganization of hydrated collagen lattices by human skin fibroblasts

65 SHAW, S. R. Asymmetric distribution of gap junctions amongst identified photoreceptor axons of *Lucilia cuprina* (Diptera)

81 SEPÚLVEDA, F. V. and PEARSON, J. D. Deficiency in intercellular communication in two established renal epithelial cell lines (LLC-PK$_1$ and MDCK)

95 BOYCOTT, B. B. and HOPKINS, J. M. A neurofibrillar method stains solitary (primary) cilia in the mammalian retina: their distribution and age-related changes

119 COWIN, P., MATTEY, D. and GARROD, D. Distribution of desmosomal components in the tissues of vertebrates, studied by fluorescent antibody staining

133 MORGAN, J. and GARROD, D. HeLa cells form focal contacts that are not fibronectin dependent

147 GAVIN, R. H. *In vitro* reassembly of basal body components

155 SUNDQVIST, K. G., WANGER, L. and ENGSTRÖM, W. Permissive effect of cytochalasin B on DNA synthesis in concanavalin-A-treated lymphocytes

167 DENTLER, W. L. Attachment of the cap to the central microtubules of *Tetrahymena* cilia

175 FUKUMOTO, M. The apical structure in *Perophora annectens* (tunicate) spermatozoa: fine structure, differentiation and possible role in fertilization

189 HUME, D. A., LOUTIT, J. F. and GORDON, S. The mononuclear phagocyte system of the mouse defined by immunohistochemical localization of antigen F4/80: macrophages of bone and associated connective tissue

195 MCDONALD, S. A. and DURSTON, A. J. The cell cycle and sorting behaviour in *Dictyostelium discoideum*

205 WOOD, A. and THOROGOOD, P. An analysis of *in vivo* cell migration during teleost fin morphogenesis

223 MILLIKIN, B. E. and WEISS, R. L. Distribution of concanavalin A binding carbohydrates during mating in *Chlamydomonas*

241 ROBERTS, I. N., HARROD, G. and DICKINSON, H. G. Pollen–stigma interactions in *Brassica oleracea*. I. Ultrastructure and physiology of the stigmatic papillar cells

255 ROBERTS, I. N., HARROD, G. and DICKINSON, H. G. Pollen–stigma interactions in *Brassica oleracea*. II. The fate of stigma surface proteins following pollination and their rôle in the self-incompatibility response

265 KURIYAMA, R., KERYER, G. and BORISY, G. G. The mitotic spindle of Chinese hamster ovary cells isolated in taxol-containing medium

277 KURIYAMA, R. Activity and stability of centrosomes in Chinese hamster ovary cells in nucleation of microtubules *in vitro*

297 MAEDA, Y. The presence and location of sporopollenin in fruiting bodies of the cellular slime moulds

309 LANFRANCHI, G., LINDER, S. and RINGERTZ, N. R. Globin synthesis in heterokaryons formed between chick erythrocytes and human K562 cells or rat L6 myoblasts

321 Kowalczyńska, H. M. and Nowak, M. Effect of cell–substrate interaction time and shearing force on adhesion of L1210 cells to collagen and glass

335 Zambonin Zallone, A., Teti, A. and Primavera, M. V. Monocytes from circulating blood fuse *in vitro* with osteoclasts

343 Hyldahl, L. Primary cell cultures from human embryonic corneas

353 Murphy, D. B. and Grasser, W. A. Intermediate filaments in the cytoskeletons of fish chromatophores

367 Kurano, S., Ishida, M. and Ishimaru, Y. Roles of calcium in aggregation of rat ascites hepatoma cells by cell surface-associated adhesive factor

383 Chambers, T. J., Revell, P. A., Fuller, K. and Athanasou, N. A. Resorption of bone by isolated rabbit osteoclasts

401 Karatza, C. and Shall, S. The reproductive potential of normal mouse embryo fibroblasts during culture *in vitro*

411 White, F. H. and Gohari, K. Desmosomes in hamster cheek pouch epithelium: their quantitative characterization during epithelial differentiation
